

Dear Customers,

once again we have some NEWS for you concerning Hermann Medizintechnik.
This is as well the reason for the new Red Flash.

The brand new catalogues are available!

- Our actual catalogue „**Endoscopic Units**“ has been overworked, new items have been added and the catalogue has been redesigned. All units out of the Hermann product range are included into the catalogue.

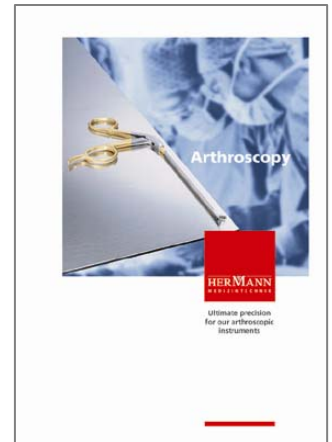

- To complete the range „Endoscopic Units“ we do have a new „**Electrosurgery - HF Generators and Accessories**“ brochure as well. Here you can find all the Accessories needed for the HF Units, starting with cables up to standard electrodes!

- Last but not least: as promised the brand new **Arthroscopy** catalogue is also available. New items are included in here as well, for example: new handle types for the Arthroscopy punches, scissors and graspers and as well for the not detachable hand instruments.

Please feel free to ask for the new brochures and inform yourself about our new items (order sheet for brochures attached).

For further information and upcoming questions our Hermann Team will be available for you at any time.

We look forward to hearing from you.

We wish you a lot of success with our new products!

Your Hermann Medizintechnik Team!
